User's Notes for PCA-6742 User Manual Ed1

The I/O port address of the watchdog timer should be 2E (hex) and 2F (hex).

The red mark of the following photo on PCA-6742 User Manual Ed1(page:42) is wrong.

C.1 System I/O ports

Addr. Range (Hex)	Device
000-00F	DMA controller
020-021	Interrupt controller 1, master
022-023	Chipset address
040-043	Timer / Counter Register
048-04B	PWM Control Register
060/064	Keyboard / Mouse Control Resisters
061	NMI status and Control Registers
068-06D	Watchdog Timer 1 Control Register
065/067	Watchdog Timer Reload Register

Table C.1: System I/O ports

We will correct it in the user manual of next version.
